Operational Verification at Installation using Agilent Technologies Personnel and the 8960 Test Processes and Software

Agilent Technologies 8960 Series 10
Wireless Communications Test Set

Service Description

The Agilent Technologies 8960 Series 10 Operational Verification at Installation Service is an on-site delivered inspection and test process for preparing the 8960 test set for system integration. System installation is optional with this service.

What You Will Receive

All 8960 Series 10 test sets and associated options and hardware will be prepared for customer applications.

The service includes:

- Unpacking the equipment
- Inspection of shipment quality
- Assembly if required
- Final operational adjustments if required
- Testing to ensure functional performance
- Preparation of equipment for system installation
- Documenting of quality checks and tests

The service can optionally include:

- Installation of equipment into systems

Service Requirements

Customer Responsibilities

Instruments must be received and held in a central location in preparation for delivery service. Adequate work area, power, and shipping container disposal must be provided. Careful coordination of product delivery and customer requirements for installation is essential.

Delivery Method

Agilent Technologies delivery teams travel to the customer site for this service. Our teams are composed of experienced technical staff. The size of the team is determined by the number of products.

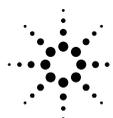

Equipment

The delivery team will provide necessary tools and test equipment. The customer must provide adequate power and bench space for the service. One to four benches may be required depending on order size.

Service Benefits

Products Ready for Application

Your 8960 Series 10 test set and associated hardware will be fully inspected and prepared for system installation. All instrument functionality will be tested to ensure that it meets or exceeds requirements necessary for phone test applications. Defective products or materials can be identified and quickly resolved.

Agilent Technologies
Innovating the HP Way

Products Inspected and Tested by Qualified Agilent Technologies Personnel

Take advantage of Agilent's experienced personnel to ensure that your new purchase is ready for production testing. Our delivery teams are experienced 8960 Series 10 technical staff members who know the product and are dedicated to your success.

Service Scheduled According to Your Needs

In most cases the delivery and inspection of the product can be coordinated to fit your particular production requirements.

Ordering Information

To order the 8960 Series 10 Operational Verification at Installation Service call 1-800-472-5277. Outside the U.S., contact your nearest Agilent Technologies sales office. Minimum order quantities may apply.
