ADDITIONAL INFORMATION:		

Situation:

It has been found that the instruments with affected serial numbers listed above have incorrect information printed on the power rating label. The instrument does NOT support 400 Hz operation at 100-127V.

**Solution/Action:**

Order a L4421-84303 L44xxA Power Rating Label and apply it over the existing power rating information on the instrument. After applying the L4421-84303 label, it should look similar to the picture below.
